Persornal Portfolio

More About me

Technologies used - React js, JavaScript, BootStrap

Shop-IT | MERN

- E-commerce, short for electronic commerce, refers to the buying and selling of goods or services over the internet. Shop-IT is built with this purpose in mind, enabling users to browse, select, and purchase products online.

Current Status

- Backend development phase: Completed, tested, and ready for integration with the frontend.
- Frontend development: In progress, utilizing ReactJS. API endpoints for fetching data from the backend have been implemented, with focus on enhancing user interface and experience.

Technologies used-MongoDB, React, Express and Nodejs

Currency Converter

- Experience the convenience of quick currency conversions with our Currency Calculator project. Crafted with a blend of JavaScript for dynamic functionality and HTML/CSS for a sleek user interface, this project simplifies currency conversion tasks with ease.
